

Week 24– Balanced Budget

Grade: Grade 9 **Unit:** Financial Literacy

Curriculum Expectations

Mathematics: Identify different ways to maintain a balanced budget, and use appropriate tools to track all income and spending, for several different scenarios

SEL: Make connections between math and everyday contexts to help them make informed judgements and decisions

Activity

- 1) Your task for this activity is to create 2 different balanced budgets for 2 different scenarios.
- 2) To start, you will research different wages and salaries for 2 different jobs. Record their salaries in the chart below.
- 3) After that, you will create 2 separate balanced budgets, one for each job. Your budgets must account for income and basic expenses. Basic expenses include monthly phone plan, food, clothing, housing, entertainment and miscellaneous.
- 4) Now you will fill out the chart below, with expected monthly expenses and income in order to create 2 different balanced budgets.
- 5) It is important to be realistic with your expenses. Make sure that at the end that your income is equal to or greater than your expenses!

Check for Understanding

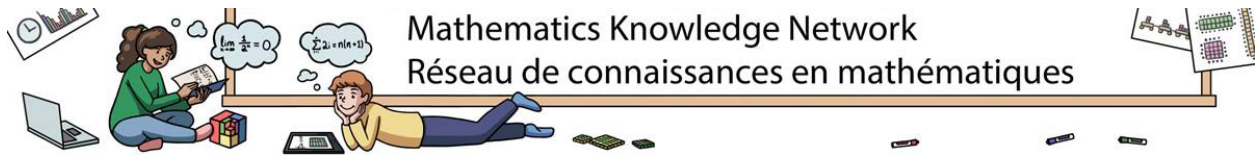

I can use appropriate tools to track all income and spending.

I can display my findings in a chart.

I understand the importance of mathematics in my daily life.

Materials

Recording sheet attached below, pencil, internet access

Balanced Budgets

Average monthly income for job 1=

Expense	Expense amount
Monthly phone plan	
Average food costs	
Entertainment	
Clothing	
Miscellaneous	
Housing	
Amount left	

Average monthly income for job 2=

Expense	Expense amount
Monthly phone plan	
Average food costs	
Entertainment	
Clothing	
Miscellaneous	
Housing	
Amount left
